Garbage Disposal Facility is in "State of Emergency."

Due to the increasing amount of garbage disposal during New Year holidays, the incinerator cannot hold garbage any longer.

Please cooperate with garbage reduction through sorting them properly.

From today, let's work on it at home!

Drain any excess water from kitchen waste before discarding!

About 14% of burnable garbage is kitchen waste, and most of it is water. Squeezing your kitchen waste before discarding can reduce the amount of garbage.

To prevent fire accidents

Portable Gas Burner Fuel Cans are Hazardous Trash!

When it gets colder, the use of gas burners increase. It can cause fire accidents if you dispose of them incorrectly. Please dispose of them as '**hazardous trash.**'

How to dispose: Empty the cans completely and dispose of them in hazardous trash basket at your area's designated location. (Please do <u>NOT</u> poke holes in the cans to avoid explosion.)
