

January 10th is the reference to “Dial 110”

“Dial 110” is the emergency number to secure your safety when incidents or accidents occur.

You should only dial 110 in emergency cases such as; incidents, accidents or regarding information about a suspicious person (cars), so the police officers can respond to the emergency.

Are you reporting an incident or accident?

YES

“Dial 110” as soon as possible
for reporting an emergency

Attention in reporting 110!
Please answer calmly to the questions which the police personnel asks.

1. What kind of incidents or accidents occurred?
2. When the case occurred?
3. Where the case occurred?

NO

- The persons who cannot speak Japanese, must have someone who speaks Japanese or tries to answer the questions calmly in Japanese by themselves.

“Internet Banking” Security Measures

Q) I often use internet banking for the convenience of a 24 hour a day service. However, I heard on the news that some internet banking users have had their bank fraudulently accessed and their money transferred without their consent.

Why are these cases happening?

Is there anything we can do to prevent it?

A) 【The cause】

Suspects transmit the virus to computer or smart phone and steal personal information such as IDs and passwords to operate remotely.

【Measures for prevention of loss】

- ✓ Installing and renewing the most recent anti-virus software and pattern file.
- ✓ Set your Windows OS such as; Flash, Java and others to automatic update to keep it updated to the most recent condition.
- ✓ You should use an active “Onetime Password” which the banking facility provides.
- ✓ If you are the user of the system in which you get e-mails from the bank when you start internet banking, you should set to receive a message to your cellphone’s e-mail address.
- ✓ Do not use the password which you use on other internet services.
When setting a password, you should use a secure password.
