

Information on the Fourth Dose of COVID-19

The fourth dose of the vaccine is available to persons 60 years of age and older, and to persons between 18 and 59 years of age who have an underlying medical condition. For those 60 years of age or older, the fourth vaccination ticket will be sent approximately five months after the third vaccination, but for those 18 to 59 years of age with an underlying disease who wish to be vaccinated, it is necessary to submit an application form in advance, however, those who have already applied for the first and second vaccinations as those who have underlying medical conditions do not need to reapply this time.

Eligibilities: those who receive treatments in a hospital or hospitalized for the following illnesses, etc.

1. Chronic respiratory disease
2. Chronic heart disease (including high blood pressure)
3. Chronic kidney disease
4. Chronic liver disease (cirrhosis, etc.)
5. Diabetes being treated with insulin or oral medication, or diabetes associated with other diseases
6. Blood diseases (except for iron deficiency anemia)
7. Diseases that reduce the function of the immune system (including malignant tumors that are undergoing treatment or palliative care)
8. Receiving treatments that decrease the function of the immune system, including steroids
9. Neurological or neuromuscular diseases associated with abnormalities of immunity
10. Neural or neuromuscular diseases that result in reduced bodily functions (including breathing disorders)
11. Chromosome abnormality
12. Severe mental or physical disabilities (a combination of severe physical disability and severe intellectual disabilities)
13. Sleep apnea syndrome
14. Serious mental illnesses (hospitalized for treatments of mental illnesses, or holding the Mental Disability Certificate "Seishin Shogaisha Hoken Fukushi Techo," or falling under the category of "severe and continuous" in medical care for services and supports for persons with disabilities (outpatient mental health care)) or intellectual disabilities (holding the Medical Treatment and Education Handbook "Ryoiku Techo")
15. BMI of 30 or more
16. Admitted by a physician as having a high risk of serious illness in case of COVID-19 infection.
