

Please confirm the opening/closing status and congestion degree of the refuge shelters when evacuating.

At the time of disaster evacuation, we will provide the information about opening/closing status and congestion degree of the refuge shelters through smartphone and PC, so that people can evacuate more safely. (Available languages: Japanese, **English**, Chinese, Portuguese, Spanish, Vietnamese, and Tagalog)

Providing information

(1)Opening/Closing status of the refuge shelters

We will indicate the available refuge shelters in ascending order of distance from your current location by using GPS on your smartphone.

(2)Congestion degree of the refuge shelters

We will indicate congestion degree of the refuge shelters in 6 levels from “Uncrowded” to “Full”

(3)Route indicating to the refuge shelters

We will give you directions on the map from current location to the refuge shelters by using Google Maps.

Others

- No need to install any additional apps, you can confirm by accessing the URL mentioned below.
- Confirming the congestion degree of the refuge shelters will also be helpful to avoid the 3Cs (Closed spaces, Crowded places, Close-contact settings).
- You may not be able to access the website on feature phones.
